The Story Behind the Fairytale

How Rich Frank Named Pretty Woman

Rich Frank built a remarkable legacy in Hollywood, leading Paramount Television Group and Chris-Craft Television, helping launch the USA Network, and guiding beloved television classics like *Cheers*, *The Golden Girls*, and *Ellen*. He went on to serve as President of Disney Studios, overseeing blockbuster films such as *Aladdin*, *The Lion King*, and *Pretty Woman* which become a global phenomenon and an enduring cultural touchstone.

The inspiration for *Pretty Woman* struck while Rich Frank was in Paris preparing to open Euro Disney. The film was originally planned to be called “3,000”, a project whose prospects were uncertain and whose “intent to see was at zero.” As Rich drove to a meeting, Roy Orbison’s “Oh, Pretty Woman” came on the radio. “And in that moment, it just clicked,” Rich recalls. Recognizing the perfect match between the song and the story, he immediately called the studio to secure the rights.

When told it would be expensive, he didn’t hesitate: “Just buy it.” That bold decision changed everything. The film’s title was updated, the song became an enduring anthem, and *Pretty Woman* went on to become a global sensation—an unforgettable classic that stands as a testament to Rich Frank’s vision, instinct for storytelling, and ability to turn inspiration into cinematic magic.
